

# Paw Prints

**Welcome back PAWS pals! We made it through the holidays which means it's smoooooth sailing from here on out! We hope all of our wonderful clients had an amazing holiday; we have a lot of new and exciting things happening at PAWS this year and we can't wait to share! Let's crack into it!**

*Have you heard about Belly Bliss?*

**As many of our clients know, Dr. Aronson was recently featured in a commercial promoting an amazing new product called Belly Bliss! This is a custom-formulated daily topper designed to support a happy and healthy digestive system in your dog. Simply add to dry or wet food once a day and bada bing! Great for skin, coat, ears, digestion, and so much more!**

**Although Arizona winters are usually not described as "harsh", temperatures can still get pretty low and we can't forget how dry it can be which can consequently affect our pets. It's important to keep those paw pads moisturized and those noses nice and wet! We carry a wonderful product here at PAWS called Sandy's Nose Butter. Made from pure shea/mango butter, grapeseed, avocado, apricot, jojoba, vitamin-e, and beeswax, this product is safe for our furry friends and even those who tend to have skin sensitivities!**

*Top breeds that need sweaters!*

- Chihuahuas
- Dachshunds
- Poodles
- Corgis
- Whippets
- Greyhounds
- Terriers

As we all know, wintertime is a notorious time of year for sickness! Not only can it hit us humans pretty hard, but our pets are struggling as well. As many dog owners know, there has been a recent outbreak of a mysterious respiratory illness here in America which has created a lot of concern. Although there have not been any confirmed cases in Arizona, it's beneficial to be aware of what to do and what not to do in this situation. If you have any worries about your furry friend being exposed it is important to avoid boarding/daycare facilities, dog parks, groomers, Pet Smarts/Petco, etc. Although sometimes it isn't completely preventable, it certainly helps to keep your dogs from high-volume areas but also to help maintain their immune system! Dr. Aronson recommends MRM Maximum Recovery Certified Organic Mushroom Powder or Thorne Small Animal Antioxidant. If you have any questions regarding these products, give us a call and ask to speak to your friendly CSR for more info! Both products are available over the counter for our established patients!

In case you didn't know, February is Pet Dental Health Month. The health of your mouth can have a significant impact on your general health and wellbeing - for pets, it's no different! Just like us, pets can also suffer from a broad range of oral problems. Most dental disease occurs below the gum line which is hard to see, think of this as an iceberg which I have pictured to the left. Thankfully, with February being dental month, all dental services with PAWS are 10% off! Yay! Maintenance is important as well. As pet owners a great source for more info on the best products to use to keep your pet's teeth healthy and happy is [vohc.org](http://vohc.org), which stands for 'The Veterinary Oral Health Council'. It's worth a read!

## BREAKING NEWS!

Put your party hats on everyone! We have some BIG news for our PAWS family! We are excited to announce we have welcomed TWO new doctors! Dr. Lorinda Fallini and Dr. Anne Shubach are officially apart of our team. Each have wonderful bios on our website ([www.pawstucson.com](http://www.pawstucson.com)) if you'd like a little more info on the newest additions! And just a reminder for our business hours; we are open Monday/Wednesday/Friday from 7:30-5:30 and Tuesday/Thursday from 7:30-7! We are over the moon for what 2024 has in store for our team as well as our amazing clients. Thank you for your continued support, patience, and kindness. Lets make this the best year yet!
